PROJECTS

Edge Computer Vision System

Jade Software Corporation

OpenVINO, OpenCV, Machine Learning, Python

- Produced software for an edge camera system that can be used to perform many computer vision tasks such as object detection and tracking
- Device can be used to detect and count vehicles in the city, license plate recognition, how many people enter/leave a building, track movements, etc
- Reduces the cost of purchasing and installing smart sensors around the city of Christchurch

C3 Church Eastside Mobile App

C3 Church Eastside

Flutter, Dart

- Developed an iOS/Android app for C3 Church Eastside using Flutter and Dart
- Allows for a new source of communication to the church congregation and a single point for updates (Events, Sermons, Location, Sermon times)
- Integrates Google's APIs (Google Calendar) with Firebase/Firestore for push notifications
- Follows Google's Material Design Scheme

WORK EXPERIENCE

Jade Software

Christchurch, New Zealand

Intern Computer Vision Engineer

Dec 2019 - Current

- Developed Computer Vision software at the Edge to enhance the capabilities of security cameras. Allowing them to perform tasks such as license plate recognition, object tracking and detection
- Extending the capabilities of household items to improve their accessibility, increasing the ways we interact with these devices and helping bring regular appliances into the future
